THE HOTEL. THE TEAM. THE GUEST. ONE COMMAND CENTER.

ONE PLATFORM. MORE CONTROL.

Coral Hospitality OS connects the guest journey, property operations and financial visibility into a single hotel management environment.

01 COMMERCIAL

Reservation inventory, booking journeys, rate plans, direct bookings and guest profiles.

02 OPERATIONS

Room boards, housekeeping task flows, guest requests, maintenance and staff access.

03 REVENUE

Folio charges, POS orders, inventory-aware sales, billing and collection workflows.

04 BACK OFFICE

Purchasing, stock control, petty cash, double-entry accounts and activity reporting.

05 INTELLIGENCE

Demand-based rate suggestions, operational checks, service insights and dashboards.

06 GUEST EXPERIENCE

Guest portal, direct-booking pages, staff coordination and configurable notifications.

SPECIAL INVITATION 30-day trial • Guided evaluation • Tailored onboarding discussion

A CONNECTED STAY, FROM FIRST CLICK TO LAST REPORT

A practical operating model that joins sales, service delivery and financial control without forcing teams to work in separate systems.

01
Discover
Guest browses direct-booking availability.

02
Reserve
Inventory, rates and booking record are created.

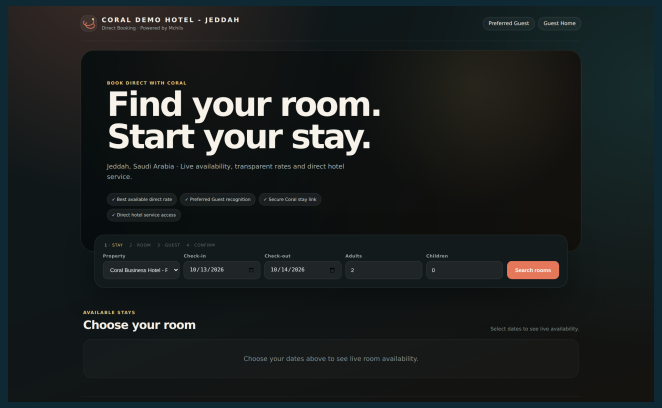

03
Arrive
Front office verifies identity and checks in.

04
Serve
Housekeeping, requests and POS post activity.

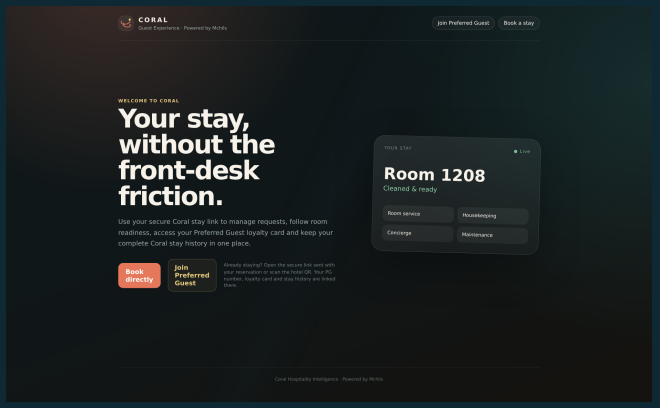

05
Settle
Folio, taxes, payments and receipt close stay.

06
Analyze
Night audit and management reporting follow.

LIVE VPS CAPTURE | Public booking journey

LIVE VPS CAPTURE | Guest portal

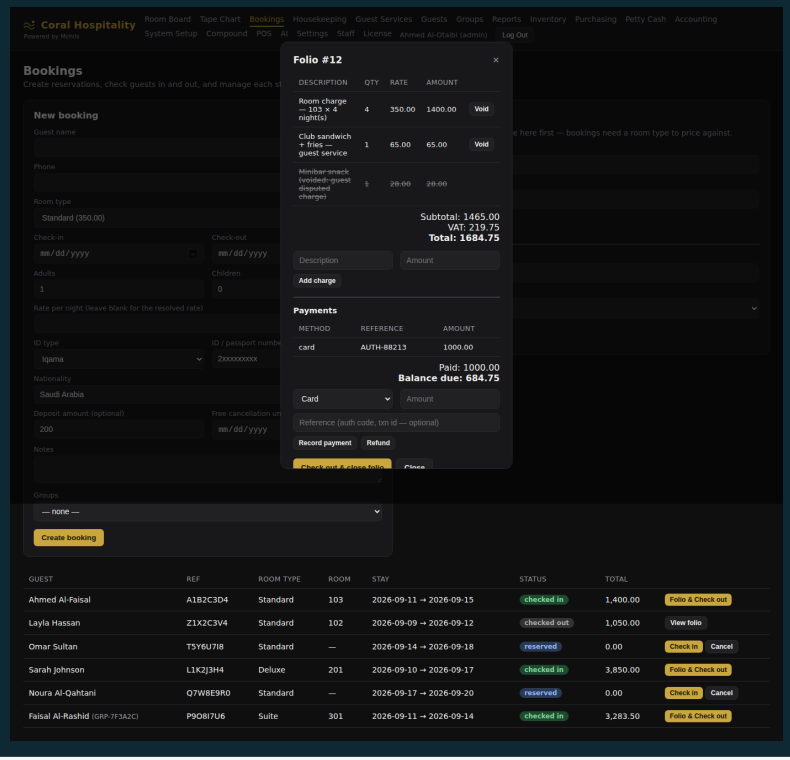

RESERVATIONS

Reservations and front office

One reservation record is the anchor for occupancy, guest service and settlement.

- Create bookings with room types, stay dates, guest profiles and available inventory.
- Track arrivals, check-in, check-out, cancellations and no-show status.
- Apply rate plans, deposits, stay notes and room assignments.
- Review folios, charges, payments and receipt actions within the stay.

DEMO CAPTURE | Reservation and guest folio

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Less fragmented handover between reservations, reception and finance.

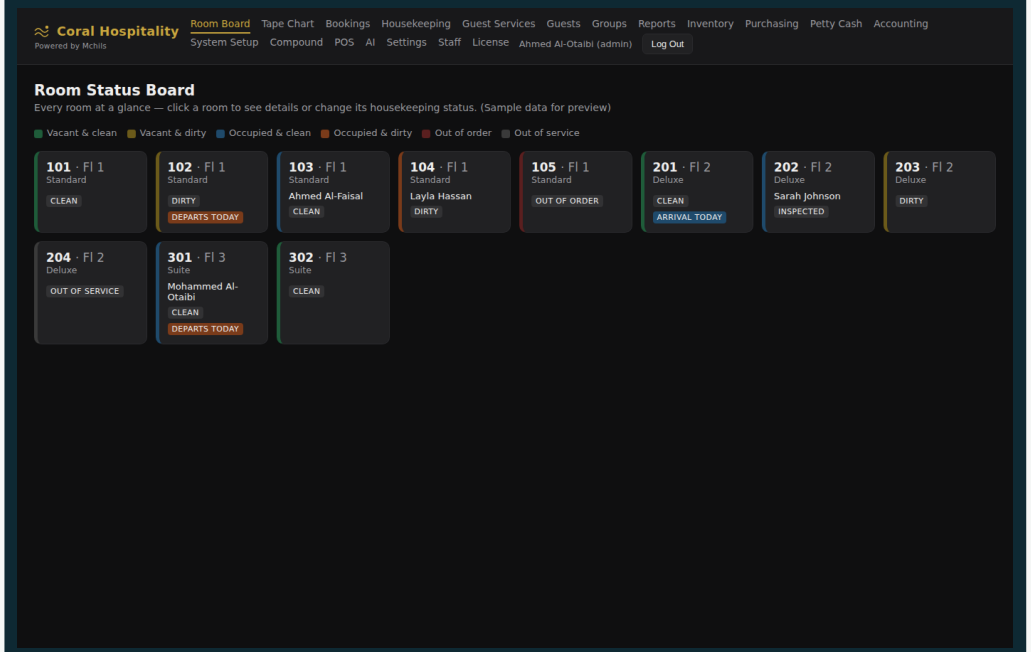

ROOM OPERATIONS

Room status command board

A visual map of room status and readiness for the next arriving guest.

- View rooms in an organized status grid without opening every booking.
- See room assignment and occupancy context alongside operational states.
- Coordinate the arrival-to-room-readiness process between teams.
- Use role-appropriate workflows for room status updates.

DEMO CAPTURE | Room status board

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Quicker shift decisions and clearer room turnover priorities.

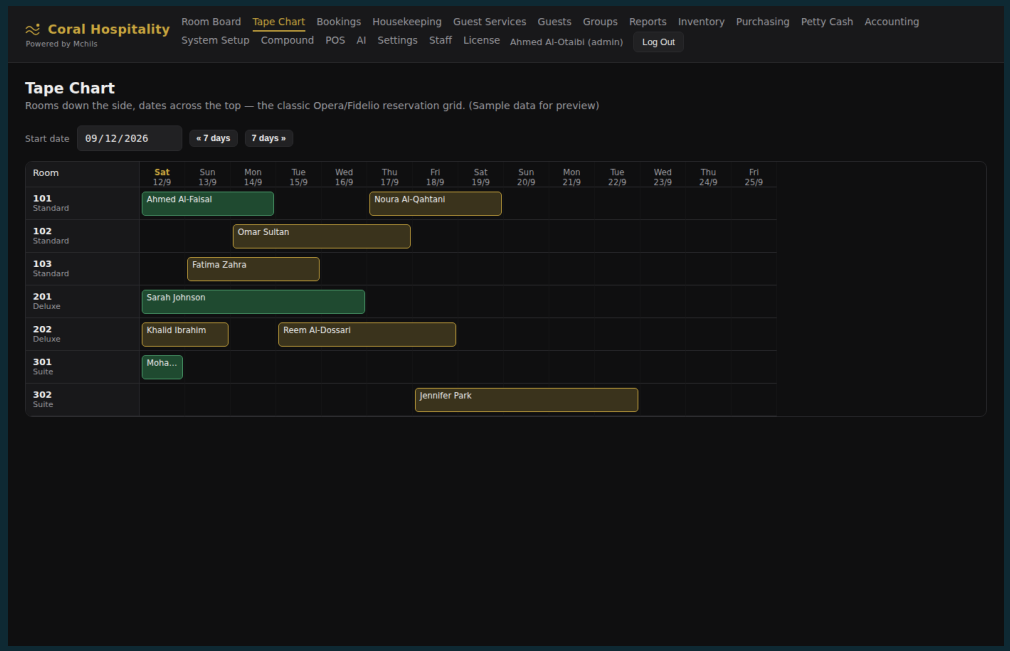

RESERVATION PLANNING

Visual reservation tape chart

A calendar-style perspective on allocation, room use and upcoming arrivals.

- Compare room-level bookings across a date-range timeline.
- Spot gaps, overlaps and booking patterns more easily than in a list.
- Help staff plan check-ins, departures and room allocations.
- Complement individual booking records with a visual operations overview.

DEMO CAPTURE | Reservation tape chart

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

A stronger view of upcoming occupancy and room allocation.

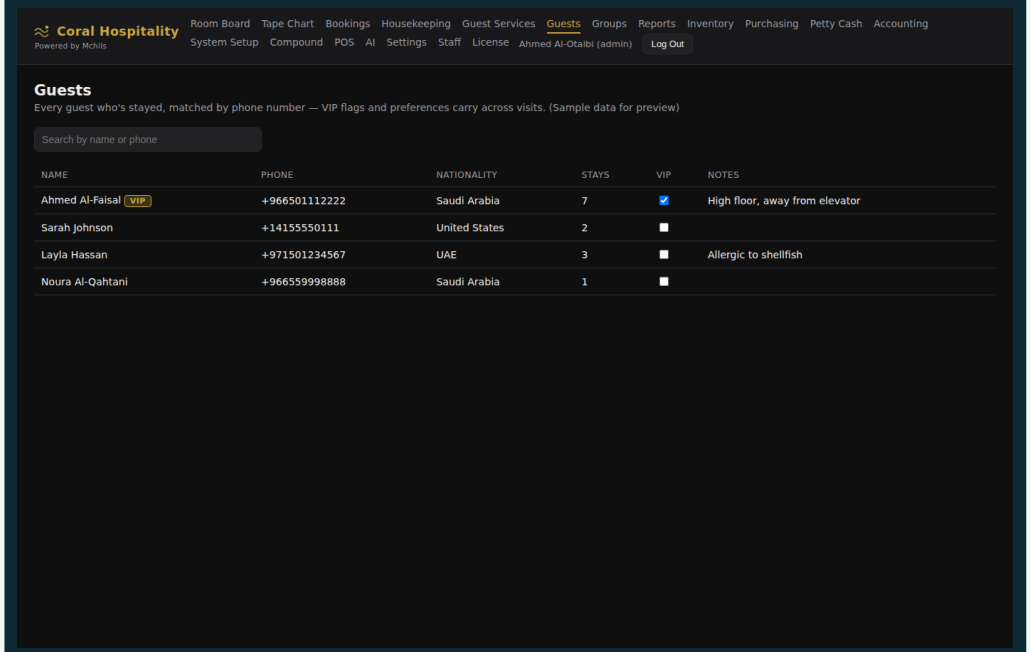

GUEST RELATIONSHIP

Guest profiles and loyalty

Bring guest information and stay history closer to the operational teams.

- Maintain searchable profiles, contact information and guest preferences.
- Identify VIP guests and relevant historical stay context.
- Display loyalty indicators based on completed stays.
- Connect guests with bookings and appropriate service activity.

DEMO CAPTURE | Guest directory

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Personalize service without fragmented guest records.

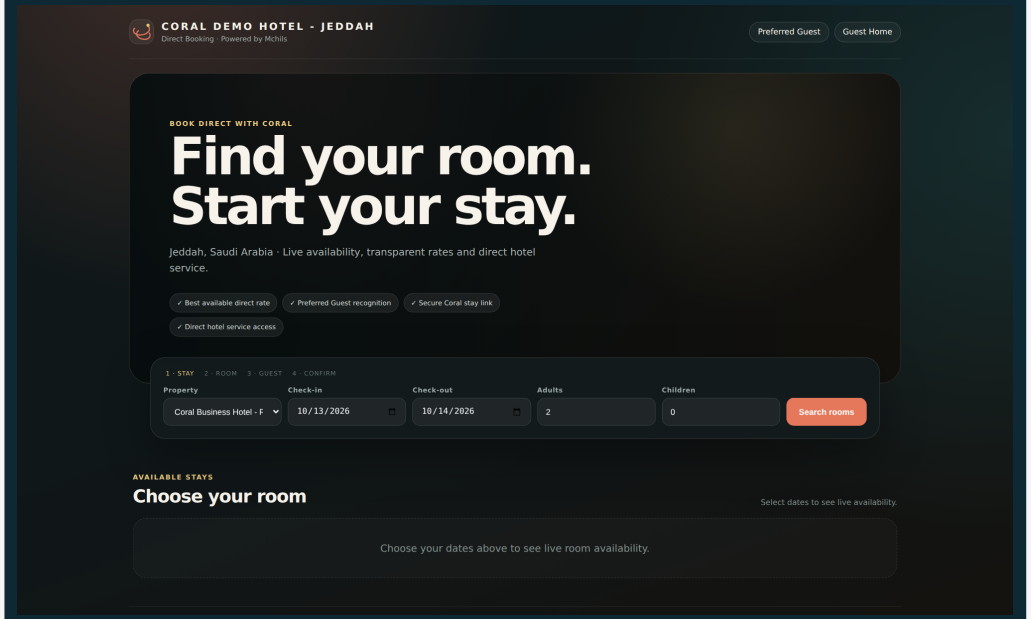

DIRECT BOOKINGS

Public booking experience

A direct booking journey where guests can search room availability.

- Offer a web-based room availability and reservation flow.
- Collect stay dates, guest details and reservation requirements.
- Route public reservations through the standard availability checks.
- Support direct guest relationships alongside third-party distribution.

LIVE VPS CAPTURE | Public room booking

SCREENSHOT SOURCE | Live Coral VPS capture - 12 Oct 2026

WHY IT MATTERS

Support direct demand capture and control the guest journey.

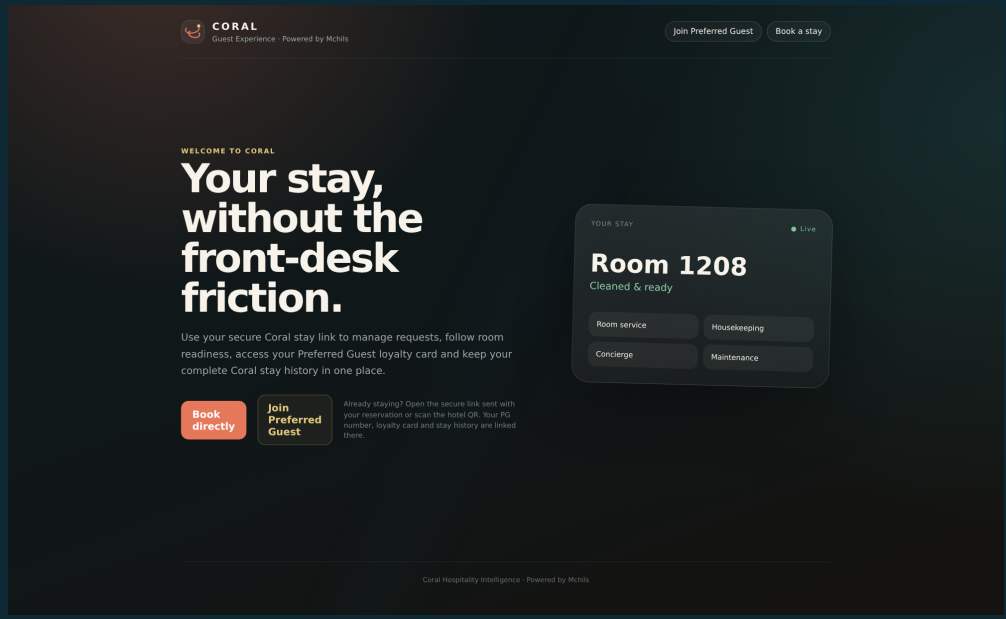

DIGITAL GUEST EXPERIENCE

Guest self-service portal

A branded digital entry point for a more connected stay.

- Provide guests with browser-based stay-related services.
- Connect guest requests with property teams where configured.
- Use room-linked status and guest-facing information.
- Extend the experience to available service categories and communications.

LIVE VPS CAPTURE | Guest self-service

SCREENSHOT SOURCE | Live Coral VPS capture - 12 Oct 2026

WHY IT MATTERS

Create convenient touchpoints and reduce routine front desk calls.

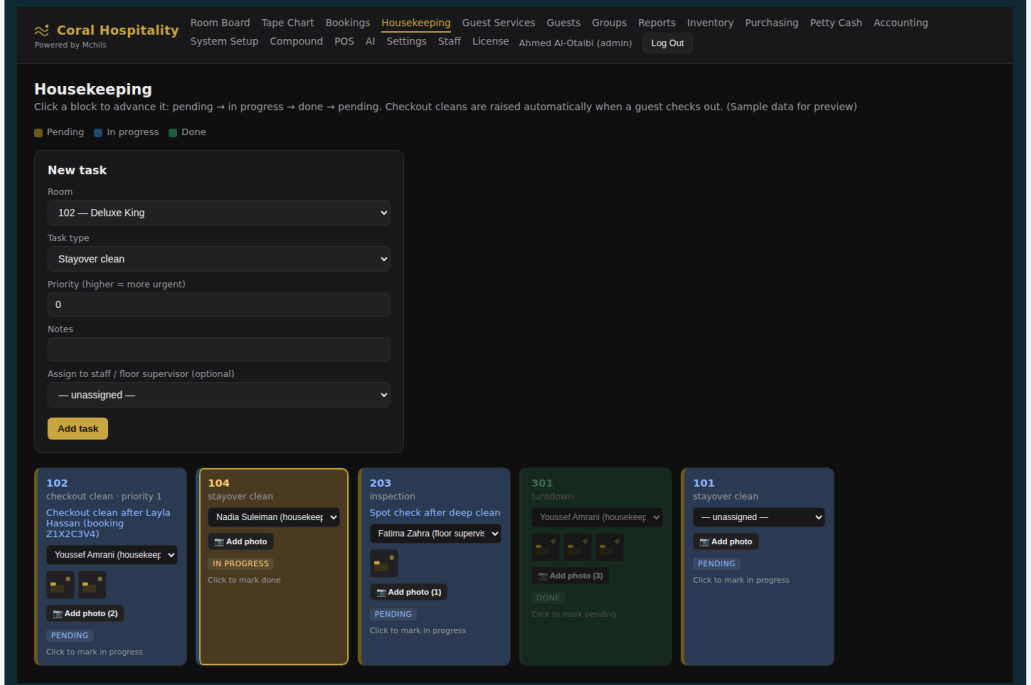

SERVICE DELIVERY

Housekeeping control center

A task board for cleaner assignments, progress and room readiness.

- Raise housekeeping tasks and assign staff or floor supervisors.
- Coordinate cleaning and room turnover from a shared board.
- Attach supported room-condition photos to tasks.
- Share status with relevant teams instead of separate messages.

DEMO CAPTURE | Housekeeping task control

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Better task ownership and stronger visibility of room readiness.

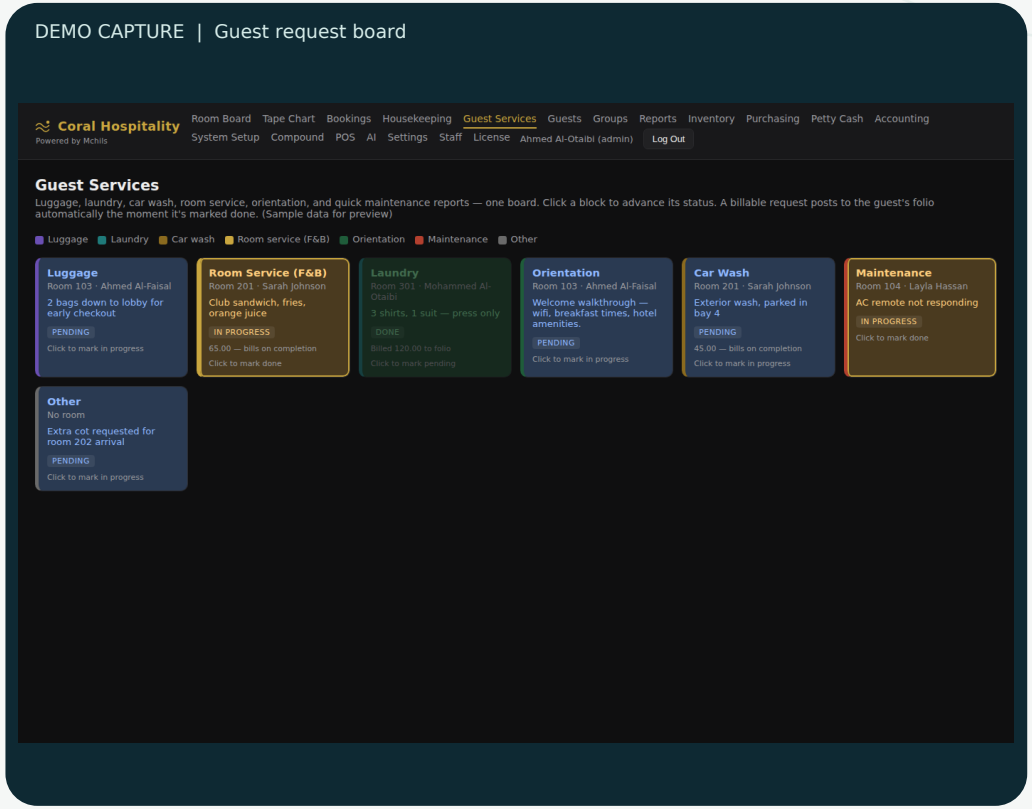

SERVICE DELIVERY

Guest requests and maintenance

Record, route and track hotel service requirements end to end.

- Manage categories including room service, laundry, luggage and maintenance.
- Track requests using operational task statuses.
- Assign a responsible team as each request progresses.
- Post eligible billable services to the guest folio upon completion.

DEMO CAPTURE | Guest request board

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Build service accountability and reduce missed handovers.

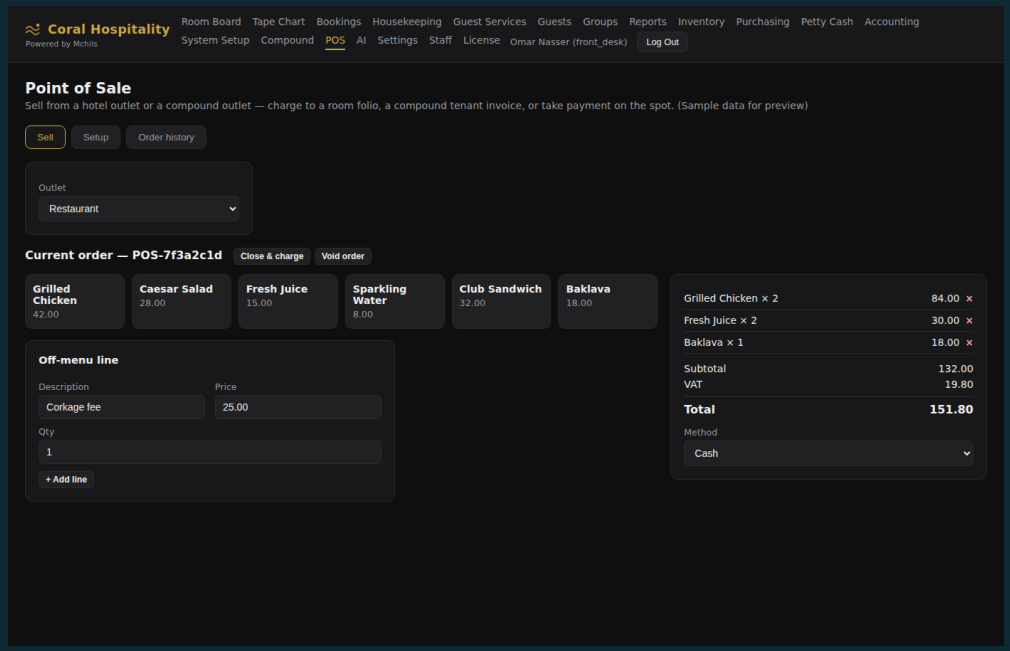

OUTLETS AND F&B

Integrated point of sale

Hotel and outlet transactions can connect to guest and financial records.

- Configure POS outlets with applicable menus and product items.
- Support direct transactions and room-folio posting where applicable.
- Link stock items to sales for inventory deduction where configured.
- Provide a consolidated view of outlet transaction activity.

DEMO CAPTURE | Point of sale

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Tighter links between outlets, guest folios and stock.

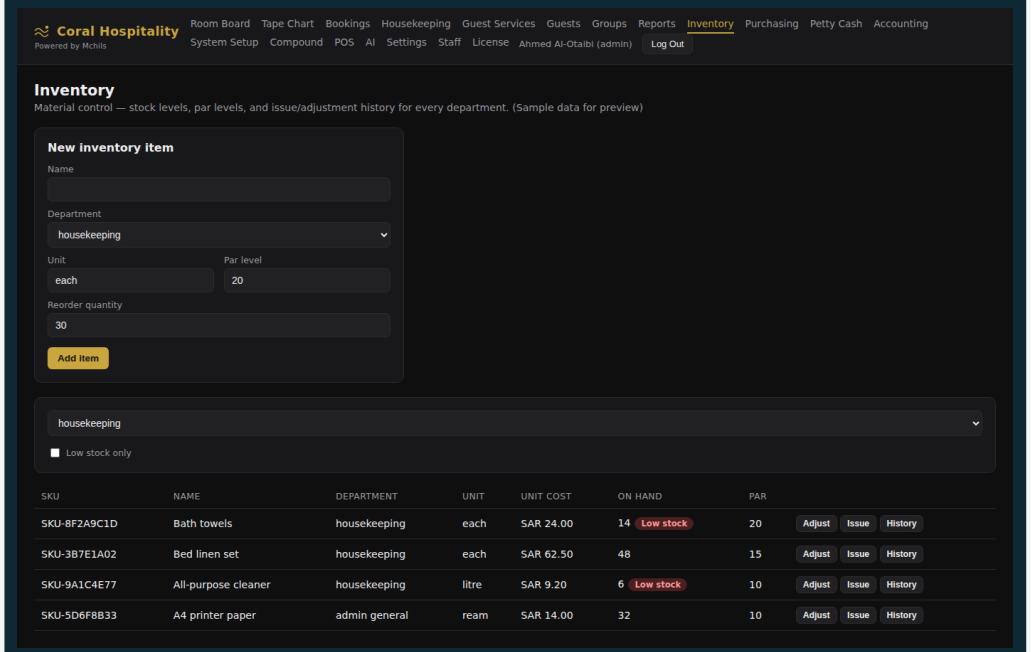

MATERIALS CONTROL

Inventory and stock management

Give purchasing, receiving and issuing teams one shared stock ledger.

- Maintain item masters, departments, reorder levels and quantities.
- Record receipts, issues and adjustments with transaction history.
- Apply weighted-average costing in supported stock workflows.
- Flag low-stock items before they disrupt hotel operations.

DEMO CAPTURE | Inventory control

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Better traceability from purchasing to consumption.

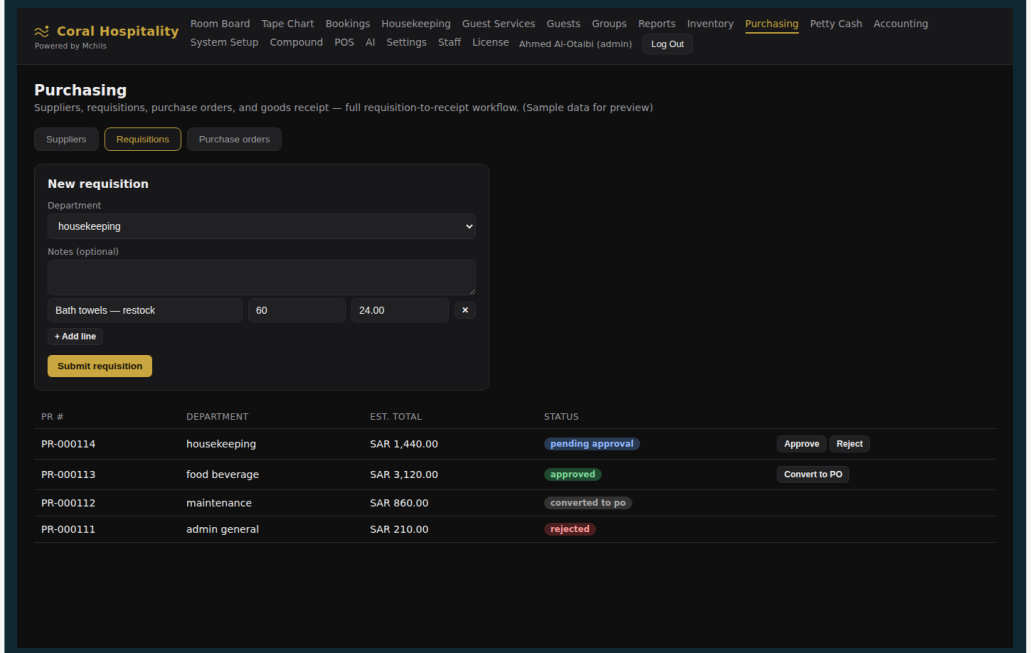

PROCUREMENT

Purchasing and goods receipt

Manage purchasing from departmental requests to receiving.

- Raise purchase requisitions and route them for approval.
- Issue purchase orders against supplier and product records.
- Capture goods receipts, including partially received orders.
- Flow eligible received stock into the inventory ledger.

DEMO CAPTURE | Purchasing workflow

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

More disciplined purchasing records and less spreadsheet rework.

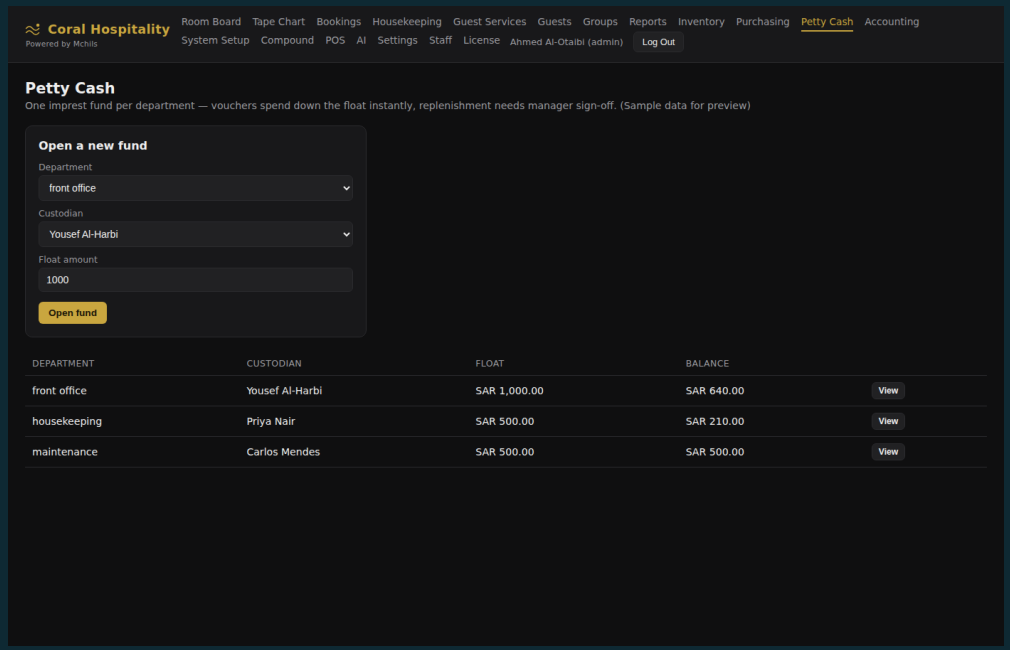

FINANCIAL OPERATIONS

Departmental petty cash

Make small cash movements visible with departmental accountability.

- Maintain petty cash floats with named fund custodians.
- Post vouchers and track cash spent against each float.
- Record replenishment requests and manager approval.
- Feed qualifying records into the property accounting process.

DEMO CAPTURE | Petty cash

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Improve traceability of routine operational spending.

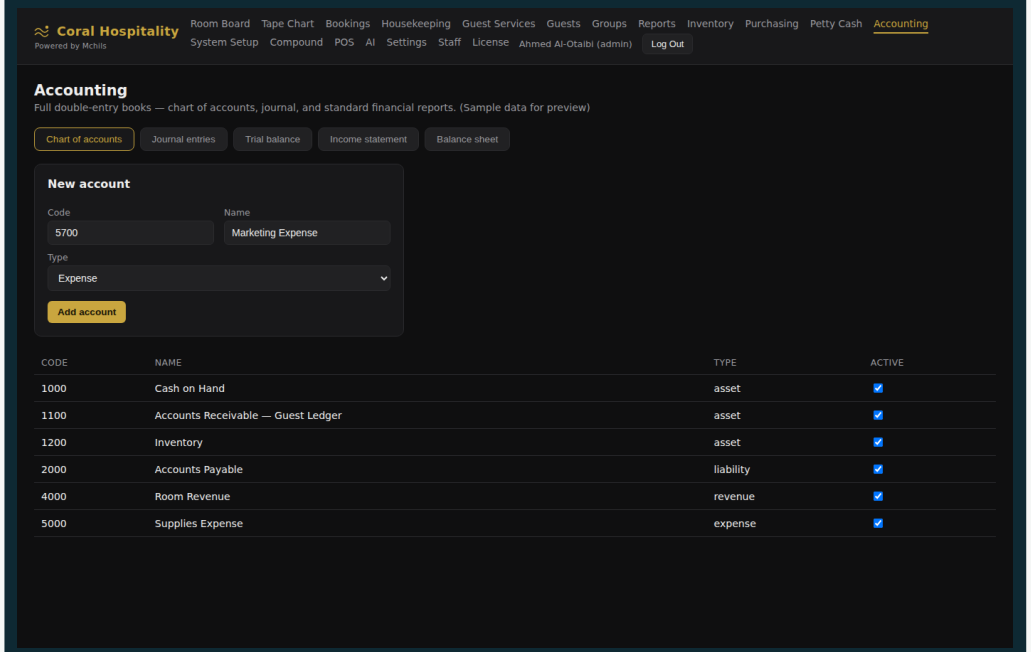

ACCOUNTING AND CONTROL

Double-entry financial ledger

A finance core linking operational transactions and accounting.

- Maintain a chart of accounts and structured journal entries.
- Apply debit and credit balance checks when posting entries.
- Review trial balance, general ledger, income statement and balance sheet.
- Relate folios, payments, stock and petty cash to recorded activity.

DEMO CAPTURE | Accounting and journals

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Connect daily hotel operations with auditable finance records.

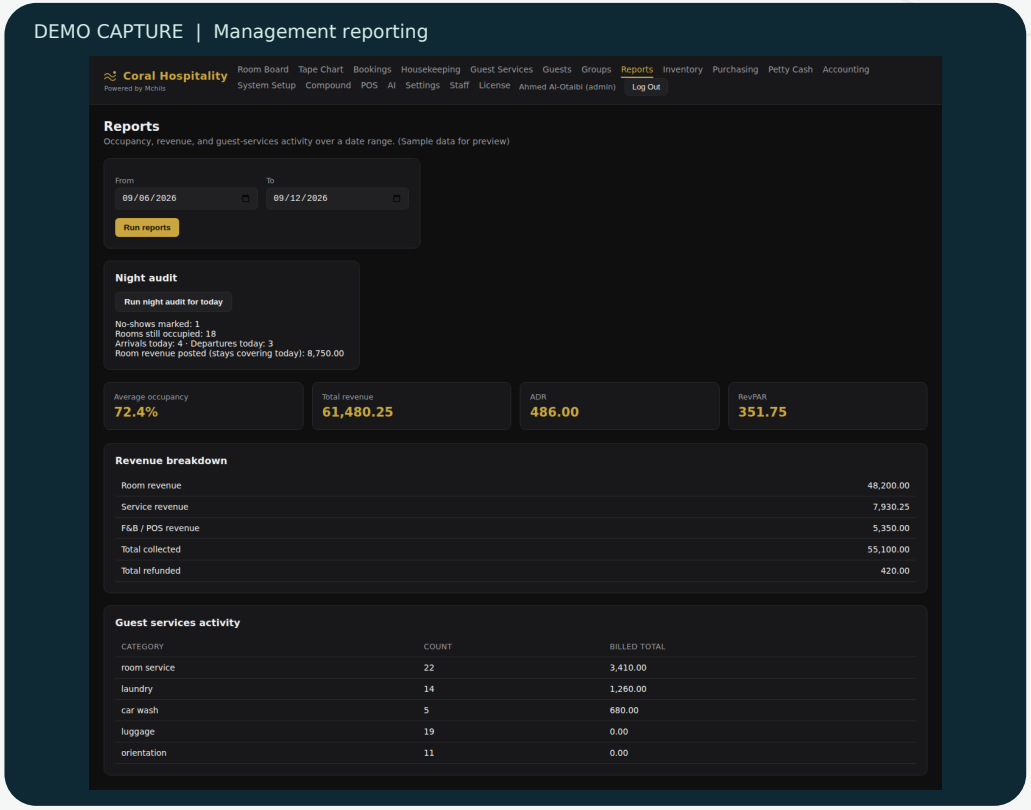

PERFORMANCE MANAGEMENT

Reporting and night audit

Turn day-to-day transactions into management reporting.

- Track occupancy and booking measures across date ranges.
- Review revenues, average daily rate (ADR) and RevPAR.
- Analyze guest-service activity and collections context.
- Use night audit to summarize the hotel trading day.

DEMO CAPTURE | Management reporting

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Faster daily briefings based on consistent operating measures.

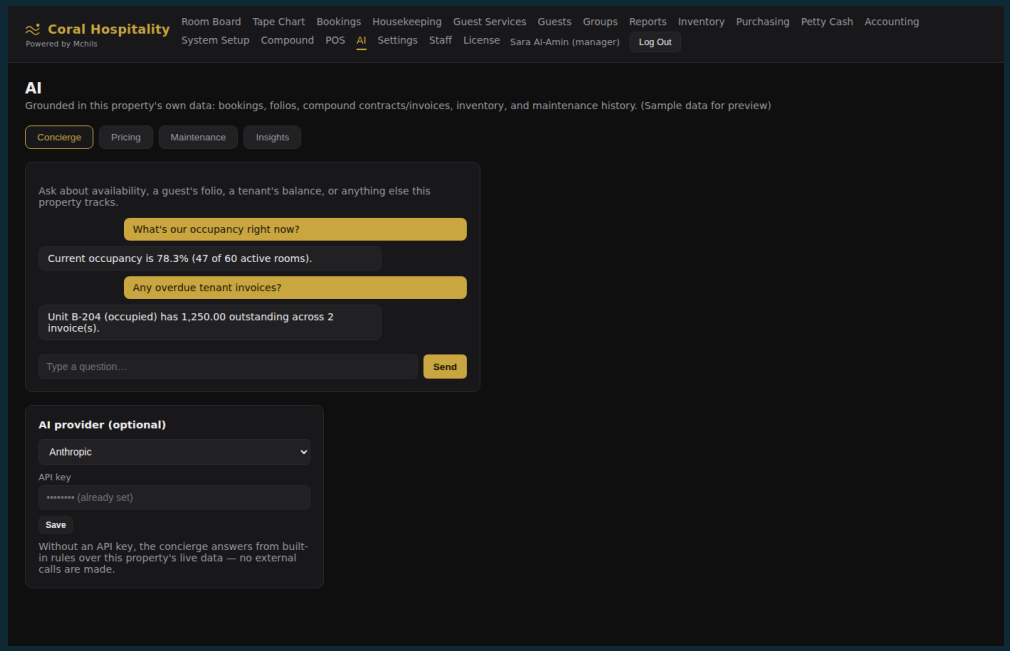

DECISION SUPPORT

AI and operational intelligence

A structured analysis layer for common pricing and service questions.

- View occupancy-informed room-rate suggestions.
- Surface low stock, overdue balances and unusual journal patterns.
- Prioritize maintenance based on recorded request history.
- Use built-in rules by default; external AI narratives require setup and testing.

DEMO CAPTURE | AI intelligence panels

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

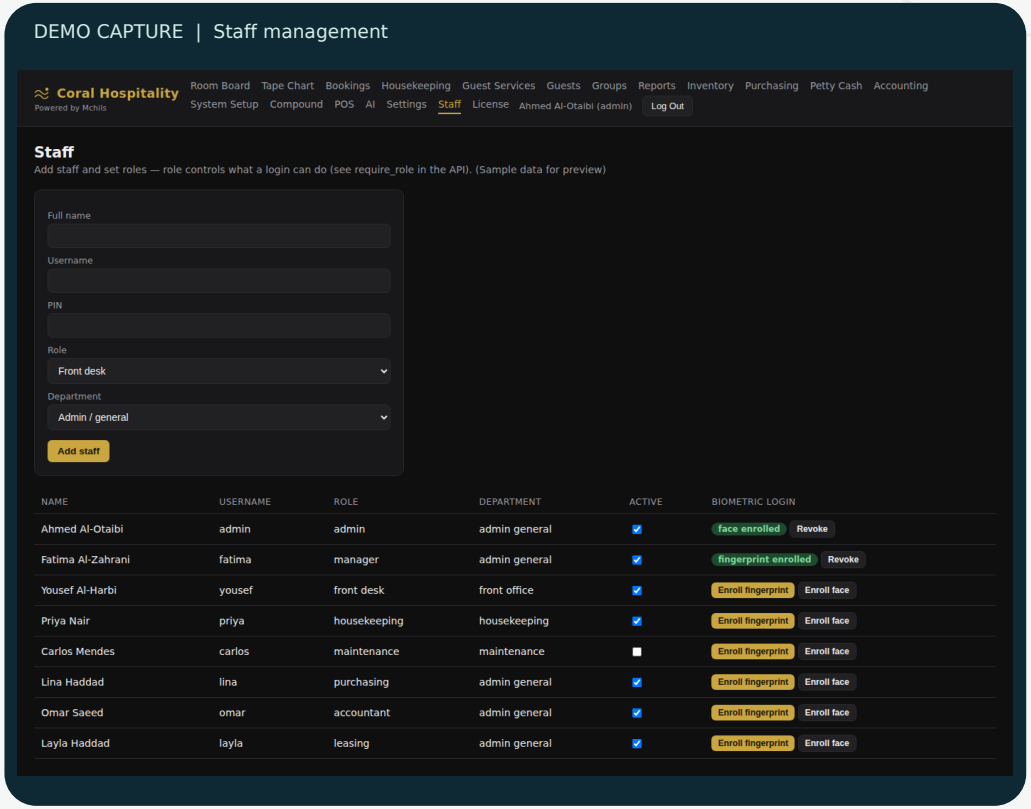

Make operational checks easier while keeping core measures auditable.

PEOPLE AND ACCESS

Staff, departments and roles

Define who can view and update each operational process.

- Create staff profiles with relevant teams and responsibilities.
- Use role-scoped access across front desk and back office.
- Assign specialist roles for housekeeping, maintenance and accounting.
- Review access policy, licensing and important audit actions.

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Stronger accountability and fewer inappropriate access privileges.

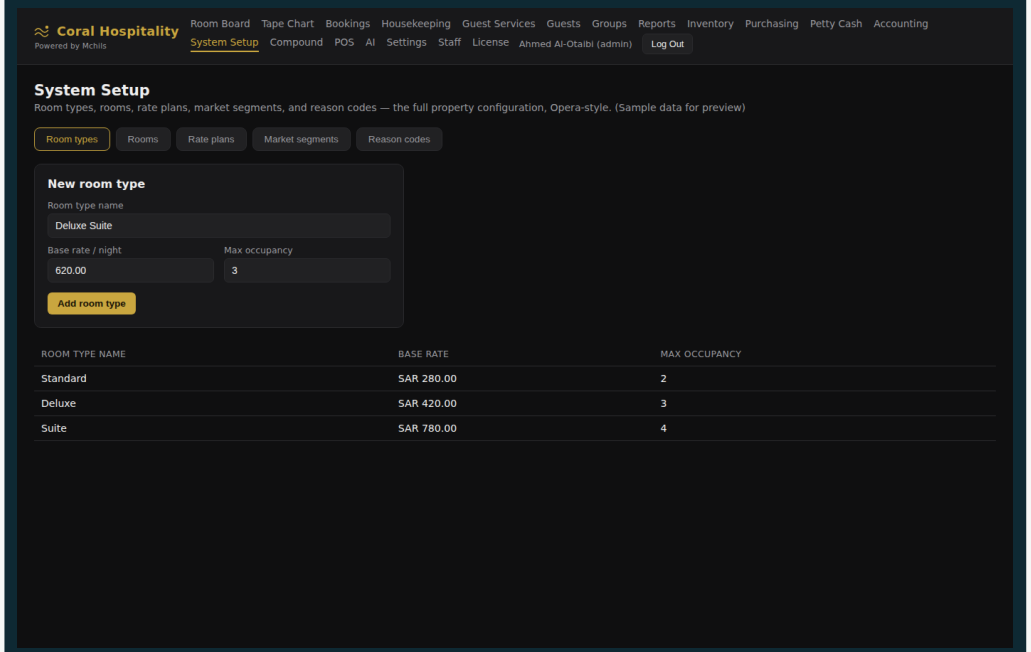

PROPERTY CONFIGURATION

System setup and rate plans

Configure essential hotel masters in a dedicated setup area.

- Configure room types, room records and applicable rate plans.
- Maintain market segments and operational reason codes.
- Set operating rules to align with property structure.
- Provide English and Arabic interface support with right-to-left layout.

DEMO CAPTURE | Property system setup

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

A consistent configuration baseline before live operation.

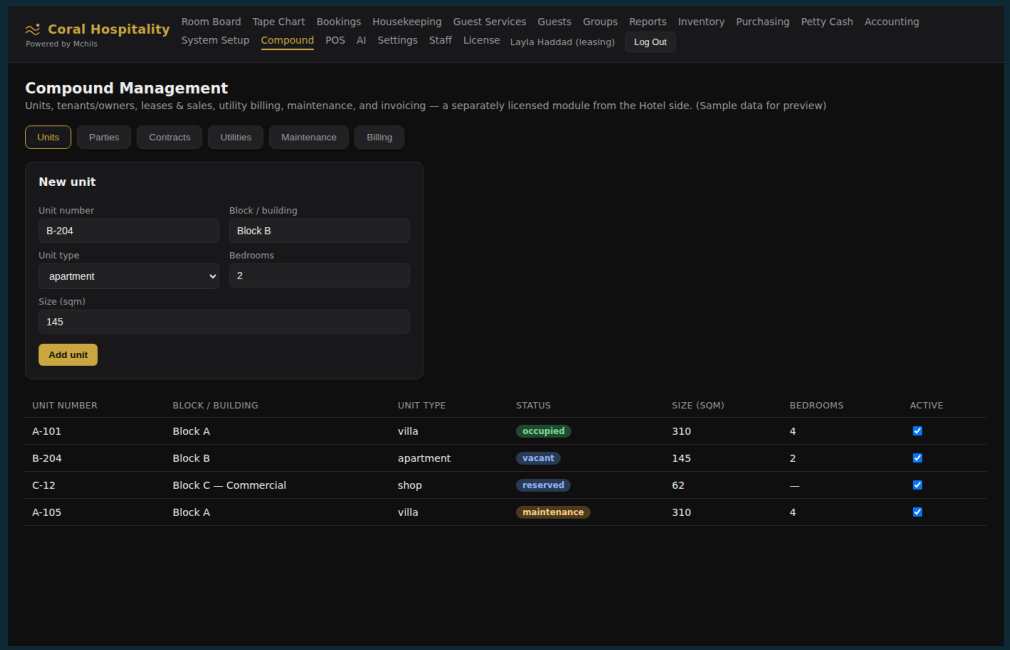

EXTENDED OPERATIONS

Compound and long stays

An optional separately licensed capability for non-nightly stays.

- Maintain units, tenants and unit-occupancy status.
- Record leases, contracts and selected recurring billing processes.
- Track utility meter readings and maintenance requests.
- Connect applicable invoices and payments to accounting records.

DEMO CAPTURE | Compound operations

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Extend the platform to residences and long-stay operations.

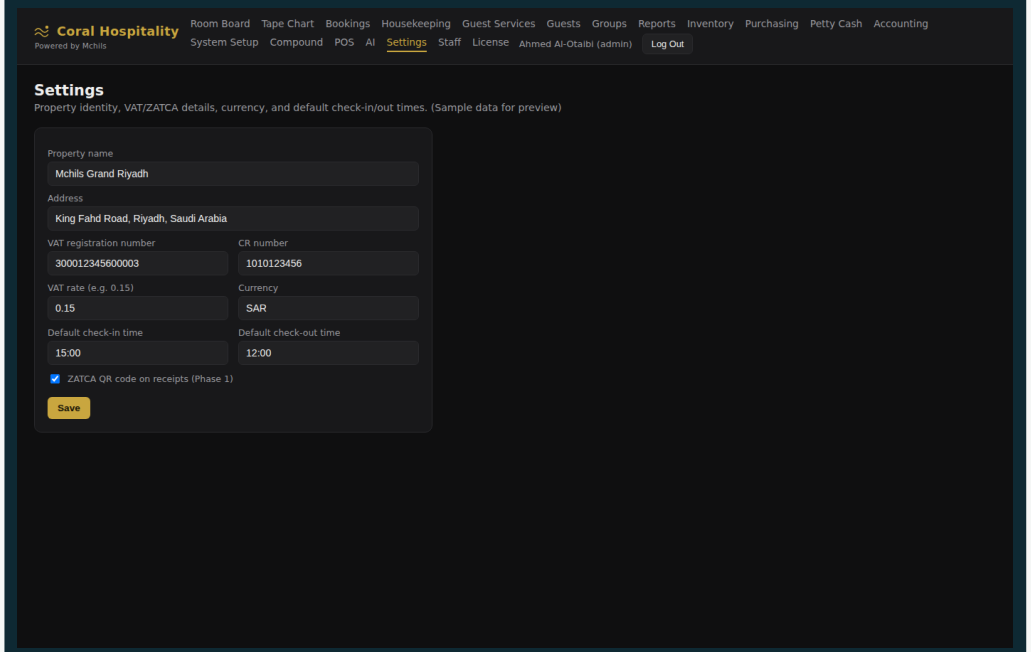

ADMINISTRATION

Settings and connectivity

Operate with controlled tax, notification and integration settings.

- Manage property identity, policies, tax options and currencies.
- Configure supported notification and outbound webhook settings.
- Review payment connector configuration and attempt logs.
- Maintain core platform settings and licensing administration.

DEMO CAPTURE | Hotel system settings

SCREENSHOT SOURCE | Original Coral screenshot asset stored on the VPS

WHY IT MATTERS

Establish a controlled baseline for property rollout.

DESIGNED TO CONNECT. DEPLOYED WITH CONTROL.

A clear distinction between capabilities visible in Coral and integrations requiring property-specific setup, credentials or certification.

READY TO EVALUATE

- **Core PMS, booking flow**
  Staff access, room board
- **Guest profiles and services**
  Housekeeping and tasks
- **Accounting and management**
  Existing demo environment

CONFIGURATION-DEPENDENT

- **Notification providers**
  Messaging webhooks and templates
- **Payment processor**
  Merchant onboarding and test keys
- **External AI narratives**
  Provider key and use-case testing

VERIFY BEFORE PRODUCTION

- **Saudi e-invoicing**
  Phase 2 CSID/signing compliance
- **ERP / Business Central**
  Live API identity and field mapping
- **Lock, telephony, OTA**
  Vendor-specific interoperability

IMPLEMENTATION NOTE

Integrations, commercial terms, security review, migration, channel connectivity and local compliance scope must be confirmed during a property-specific onboarding assessment.

YOUR 30-DAY CORAL EVALUATION

A suggested trial sequence for hotels evaluating fit and implementation requirements. Trial activation is arranged through the offer page.

DAYS 01-03

DISCOVERY

Identify property type, room count, user roles and target workflows.

DAYS 04-10

CONFIGURE

Review room inventory, rates, access roles and demo data.

DAYS 11-20

EXERCISE

Test booking, service, cashiering and reporting scenarios.

DAYS 21-27

VALIDATE

Review role handovers, finance outputs and required integrations.

DAYS 28-30

DECIDE

Agree production scope, migration plan and commercial next step.
